Feel the Difference

TELESTEPS 

No.1 in telescopic work tools

MANY ADVANTAGES

SIMPLE

We have always been convinced that the best ladder is both short and long. The telescopic ladder is easy to pull out to the desired length and securing it before use is just as quick. When the red locking catches have unfolded under each rung, this indicates that the ladder is ready for use and can handle loads of up to 150 kg.

FLEXIBLE

With the telescopic function and the minimal turning radius, the ladders are perfect even in small spaces. A Telesteps combination ladder is many ladders in a single unique ladder. In our assortment there are also smart accessories that make your work even easier.

SAFE & ERGONOMIC

Safe, functional and easy to take with you – Telesteps does not compromise on anything. The ladder is small and compact for storage and transportation. Our products are certified according to EN 131/SP/Warenwet/Der Grüne Punkt.

Our All-Day-Long ladder for all-day-long uses! When you need to stand on the ladder for longer periods of time, where ergonomic features are of importance for maximum comfort and safety - The Combi ladder is the friend for you! Whether it is height, stability or long days of work - the Combi ladder will not let you down, it will always keep you up!
