
WORKING PLATFORM

Feel the Difference

TELESTEPS 

No.1 in telescopic work tools

MANY ADVANTAGES

SIMPLE

We have always been convinced that the best platform is both short and long, while stable and easily portable. The telescopic platform is easy to pull out to the desired length and securing it before use is just as quick. When the red locking catches have unfolded under each rung, this indicates that the platform is ready for use and can handle loads of up to 150kg.

FLEXIBLE

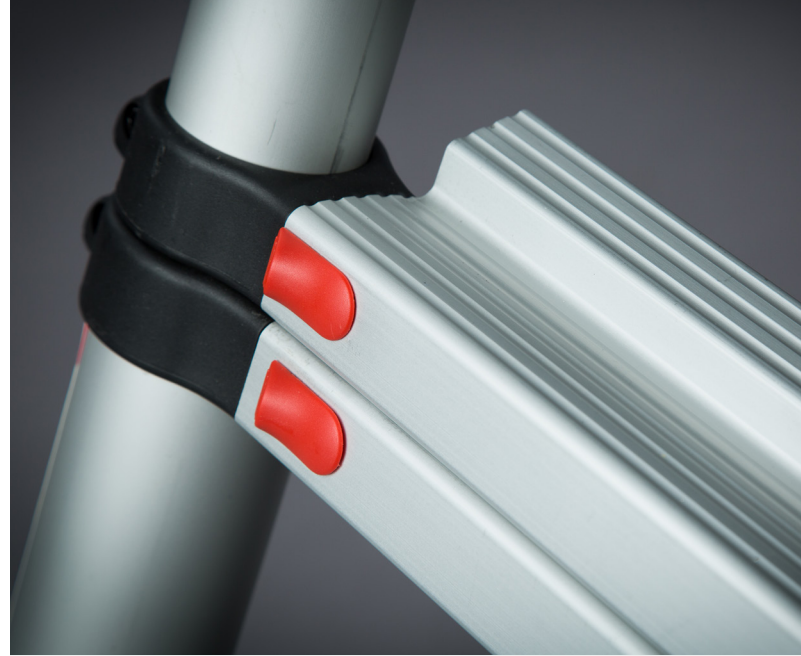

Need to reach higher while moving across larger areas? The Working Platform's height can be adjusted at three different levels without compromising stability and safety. The Telesteps Working Platform is easy to open and close, carry around and put in tight spaces for storage and transportation. It also has a handle so you can carry it with you at all times and just like our ladders, it is made of rigid aluminium specifically designed for tough challenges and surroundings.

SAFE & STEADY

Safe, functional and easy to take with you – Telesteps does not compromise on anything. Our products are certified according to SP/EN 131/Warenwet/Der Grüne Punkt.

The idealistic platform for the person standing within the same space for long periods of time; where you do not want to be stepping down and up the ladder just to move a bit to the right or left. Solid is the steadiest surface since the ground!

WORKING PLATFORM

Art. no:	61209
No. of treads:	3
Tread width:	65 mm
Working height:	2,6 m
Length, extended:	0,88 m
Length, closed:	0,74 x 0,28 x 0,62 m
Width:	0,62 m
Weight:	17 kg
